

URUEMUESIRI SAMUEL OGBE-GREEN

FRONTEND ENGINEER · WEB & MOBILE · REACT · NEXT.JS · TYPESCRIPT · WORDPRESS

+234 706 397 9371 • samuelogbe0@gmail.com • linkedin.com/in/samuel-ogbe-green • samuel-green.vercel.app

PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of professional experience building, maintaining, and optimizing production web and mobile applications across e-commerce, marketplace, and client services. Strong expertise in React, Next.js, React Native, TypeScript, JavaScript, HTML, CSS, and WordPress, with additional hands-on experience in Node.js, Express and MongoDB.

Experienced in translating Figma designs and product requirements into clean, responsive, accessible interfaces, improving Core Web Vitals, integrating REST APIs and third-party services, and troubleshooting frontend, backend, authentication, payment, and WordPress issues. Experienced in using AI-assisted development and UI tools including Lovable, Magic Patterns, Antigravity, and ChatGPT to accelerate prototyping and development while manually reviewing and refining generated output.

CORE TECHNICAL SKILLS

Frontend

React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, React Hooks

State & Architecture

Zustand, Redux, Context API, React Query, Component Architecture, Reusable Components, Design Systems

Backend & APIs

Node.js, Express.js, REST APIs, API Integration, Authentication

WordPress

WordPress Development, Custom Themes, Custom Plugins, WooCommerce, PHP, WordPress REST API, SCF, Website Maintenance, SEO

Performance & Accessibility

Core Web Vitals, Lighthouse, PageSpeed Insights, LCP, INP, CLS, Code Splitting, Lazy Loading, Image Optimization, Responsive/Mobile-First Design, WCAG, Semantic HTML, Keyboard Accessibility

AI & Development Tools

Lovable, Magic Patterns, Antigravity, ChatGPT, AI-Assisted Development, AI-Generated UI/Code Review, Rapid Prototyping

Tools & Workflow

Git, GitHub, Azure, VS Code, Chrome DevTools, npm, yarn, Figma, Agile/Scrum

Integrations

Google Maps, Google Autocomplete, Paystack, Stripe, Google OAuth

PROFESSIONAL EXPERIENCE

Frontend Developer

Aug 2023 – Present

Codelab Projects | Abuja, Nigeria

- Architected and delivered production web and mobile applications using React, Next.js, React Native, and TypeScript, consistently achieving Lighthouse performance scores above 90.
- Built responsive, mobile-first interfaces from Figma designs and product requirements, with strong attention to usability, accessibility, maintainability, and cross-browser compatibility.
- Designed, developed, and maintained 35+ custom WordPress websites for clients across e-commerce, SaaS, and professional services, focusing on responsive design, SEO, performance, accessibility, and maintainability.
- Built and customized WordPress themes using HTML5, CSS3, JavaScript, PHP and SCF, converting complex designs into clean, maintainable implementations.
- Reduced average React JS application page-load time by approximately 40% through code splitting, lazy loading, image optimization, and other Core Web Vitals improvements.
- Developed and extended custom WordPress functionality and plugins, including WooCommerce extensions and workflow automation, reducing manual content-update work.
- Optimized WordPress websites through Core Web Vitals improvements, caching, and image compression, achieving 90+ PageSpeed scores and approximately 35–50% reductions in load times across optimized sites.

- Implemented WordPress security and maintenance practices including updates, hardened configurations, malware monitoring, role-based access, and ongoing maintenance for 30+ live client websites.
- Used Lovable and Magic Patterns to rapidly create and prototype clean website interfaces and UI concepts, accelerating development while refining generated designs and code to meet project requirements.
- Used Antigravity and ChatGPT as AI-assisted development tools for prototyping, implementation, debugging, refactoring, documentation, and accelerating repetitive development tasks, with review and testing of generated output.
- Integrated Google Maps API and Google Autocomplete for location-based functionality.
- Designed and maintained application state architecture using Zustand, reducing prop-drilling complexity and cutting average bug-fix turnaround time by approximately 30%.
- Handled publishing and maintenance of cross-platform mobile applications on the Apple App Store and Google Play Store.

Frontend Developer

Jun 2020 – Feb 2023

Hob System Digital | Port Harcourt, Rivers State

- Built fully responsive and accessible React interfaces using Redux for shared application state across complex user flows.
- Led the migration from Create React App to Next.js, introducing SSG and SSR capabilities that improved SEO and reduced Time to First Byte by more than 50%.
- Integrated Paystack into e-commerce checkout flows supporting card, bank transfer, and mobile money payments.
- Implemented Google OAuth authentication, reducing signup friction and increasing new account creation.
- Developed responsive interfaces using React, JavaScript, HTML, CSS, Bootstrap, and Redux while maintaining consistent UX across desktop and mobile devices.
- Worked closely with backend developers to troubleshoot API, authentication, data, and integration issues.
- Applied semantic HTML, responsive design, accessibility principles, and cross-browser testing throughout frontend development.

SELECTED PROJECTS

Bidclover — E-Commerce / Marketplace Platform

Next.js · React · TypeScript · Tailwind CSS

- Built a full-scale marketplace platform with dynamic product pages, advanced filtering, search, and secure multi-step checkout.
- Converted the platform from a bidding-focused system into a shopping-cart/e-commerce experience based on changing client requirements.
- Optimized bundle size and implemented Incremental Static Regeneration (ISR) to improve performance at scale.
- Achieved LCP under 2.5 seconds across key product pages.
- Developed reusable components that reduced estimated future feature development time.

Iyaloja — Location-Aware E-Commerce Mobile App

React Native · TypeScript · Google Maps API

- Developed a cross-platform mobile application enabling vendors and buyers to discover nearby listings using location-based functionality.
- Integrated Google Maps and location search/autocomplete functionality.
- Managed App Store and Google Play submission and release processes, including metadata, staged releases, and updates.

ENGINEERING STRENGTHS

- | | |
|--|--|
| • Senior-level frontend development | • Web & mobile application development |
| • React / Next.js / React Native | • TypeScript & modern JavaScript |
| • Custom WordPress development | • UI development from Figma |
| • AI-assisted development workflows | • Node.js / Express backend development |
| • REST API integration | • Performance optimization & Core Web Vitals |
| • WCAG accessibility | • Payment & third-party integrations |
| • Debugging and production troubleshooting | • Code reviews and mentoring |
| • Agile/Scrum development | |

EDUCATION

B.Sc. Computer Science

Michael Okpara University of Agriculture, Umudike, Abia State, Nigeria

2016
